ClearOne Converge 880T

Module Setup

About:

Converge is a digital signal processor with mic/line inputs and mic/line outputs. Ideal for collaboration, presentation and distance communications, the 880T capitalizes on ClearOne's legacy audio technology with proven HDConferenceTM audio processing for unmatched sound and the most natural audio conferencing experience possible.

Setup Communication:

Converge 880T is controlled over IP on Port 23. In Compass Navigator, please insert IP Address under Device Properties.

Credentials may also be required; please add username and password under Device Properties if needed. The default user, "clearone", and password, "converge", is already present for convenience.

The module will not respond if the login info is incorrect.

Setup Module Device ID:

Click on the Converge Pro page under Controller Designer and under Properties, add the unit's ID to the Module Device ID field.

The module will not respond if no ID is set.

Setup Complete:

Upload and update project for use.
