

ClearOne Converge Pro2 Module Setup Guide

About:

CONVERGE Pro 2 is the industry's most advanced professional audio DSP platform for conferencing and sound reinforcement applications. It outperforms in any size room, any audio environment, any application.

Setup Communication:

The Converge Pro2 unit is controlled over TCP-IP on port 23. In Compass Navigator, please insert the IP address under Device Properties. The Converge Pro2 module also requires the unit's box number. Please enter this number as the ModuleID (default is 1). Please add one module per Converge Pro2 unit.

Setup Login:

In Compass Navigator on the Converge Pro2 device properties tab, enter the unit's username under "Login". If the unit is password protected, then enter the password under "Password". The login type is type "Common". These credentials are required for control.

Default login credentials are "clearone" for username, and "converge" for password.

Setup Complete

Upload and update the project for use.
