DSC Security
Module Setup

About:

DSC provides a state of the art security system that will protect any home or business. Compass Control makes real time status updates and arming/disarming a breeze with an easy to use interface that looks professional and attractive.

Setup Communication:

DSC is controlled over RS-232. In Compass Navigator, please drag and drop the DSC module into the corresponding I/O port.

Setup in DSC Programming Software:

Compass Control will auto-populate the partitions and zone names. Please program the DSC Panel so that Compass Control will import the proper names when using the module.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers

- Arming/Disarming
- Partition Selection
- Zone Names
- Zone Status
- Partition Names
