Key Digital Announces Compass Control Pro Partner Alliance with Digital Watchdog IP Cameras

MOUNT VERNON, NY – December, 15, 2017– Key Digital, the Leaders in Digital Video and control systems, announces an exciting alliance with Digital Watchdog. Key Digital adds the Digital Watchdog IP Cameras to its extensive and constantly growing list of integration products streamlined within their Compass Control Pro Partner Alliance program.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Digital Watchdog IP Cameras. These products and profiles are rigorously tested by Key Digital. The Digital Watchdog IP Cameras driver will allow for live stream from all IP cameras, playback control, and audio available (depending on device model).

Compass Control® users will be able to use their Digital Watchdog IP Cameras with their Compass Control® app. Digital Watchdog IP Cameras are state-of-the-art technology that offer the power of viewing live and playback video from their cameras anywhere in the world, with crystal clear resolution. Digital Watchdog's IP Cameras transmit data and receive power over the same network cable, eliminating the need to run separate cables for power and control. With additional features like UPnP and intuitive Web based UI, Digital Watchdog's cameras remove the complexity of network powered devices, while maintain unbeatable image quality and features.

“Resulting from cooperative efforts between Key Digital and Digital Watchdog, the integration of its IP Cameras within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter. “The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.

About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
