Key Digital Announces Compass Control Pro

Partner Alliance with ELK Products' M1 Security and Automation Control Systems

MOUNT VERNON, NY – December 15, 2017– Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that ELK Products' M1 Security and Automation Control Systems are now compatible with the Compass Control System.

ELK's M1 Controls incorporate security, fire, door entry control, and energy & task management to provide total control of home or business. The M1Gold & M1EZ8 offer a truly integrated solution. These IP accessible systems offer simple, yet powerful on-site and remote user interfaces, giving the consumer full control anytime, from anywhere.

The M1 Gold's built-in voice dialer can call up to 8 phone numbers and alert owners of status changes; such as, critical temperature levels, water leaks, children arriving home from school, etc. Built-in telephone remote control allows you to control temperature settings, water heater, garage door, lighting, and sprinklers plus arming/disarming system and more; by simply picking up the phone – any phone. Integrators and Installers will value the flash memory firmware, RS-232 serial port, Ethernet connectivity option, and PC programming in English text.

"Resulting from cooperative efforts between Key Digital and ELK Products, the integration of its Model 8800 thermostat within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality," stated Key Digital's COO, Michael Lakhter. *"The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,"* Lakhter concluded.

About Key Digital®

Led by the "Father of DVD", Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
