# Factor V-66

## Module Setup

### **About:**

The Factor V-66 is a power amplifier that is perfect for commercial or residential spaces. It may be expandable up to three Factor V-66 units for 36 zones.

### **Setup Communication:**

The Factor V-66 is controlled over RS-232.

### **Setup in Compass Navigator:**

Each module contains inputs that can be customized. In Zone Construction, please drag and drop the audio sources, accordingly as they are found on the back of the amp, to the inputs of the V-66 device tree.

Properly setting up the Zone Construction will allow for auto-switching when choosing an audio device in a modular project.

### **Setup Complete:**

Upload and update project for use.

### **Control:**

Compass Control offers

- Bi-Directional Control
  - Switching
  - Volume Control
  - EQ Control
  - Zone Control
  
- Other Controls
  - Selectable Controller option for multiple units
  - Zone Do Not Disturb Controls
