

Discover The Possibilities™

HAI Omni Pro II

Module Setup

About:

HAI provides the flexibility you need for the smart home you want. From lighting to security, HAI has you covered including audio, climate, and scene control.

Setup Communication:

HAI is controlled over IP on Port 4369.

Setup in Compass Navigator:

Under Setup Controllers, insert the IP address of the HAI unit. Please note that the computer running Compass Navigator must be on the same network as the HAI board.

Next, please enter the two keys for HAI in the Key Input Field, (The two keys are found in the HAI Programming software). Each key is 16 characters long.

After setting up the IP address and entering the two keys, please click "Add HAI System". Navigator will take a moment or two to gather information about the HAI board (Zone Info, Control Info, and Available Devices). Don't forget to compile the project.

Setup Complete:

Upload and update project for use.

Control:
