

Kaleidescape® Module Now Available on the Compass Control®

Kaleidescape M-Class products are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Kaleidescape M-Class Products. Compass Control® module enables seamless integration of Kaleidescape products in the Compass Control environment while greatly reducing the installation time for integrators. Module provides system users playback, audio and video controls for all networked players, while having access to a fully integrated control system.

Module Features:

- › Control over IP
- › Playback Controls
- › Audio/Video Controls
