Key Digital: MXA8x8PRO

Module Setup

About:

Key Digital® MXA8x8Pro is an Audio Matrix Switcher that has 8 Inputs to 8 Outputs, supports Two Independent Matrices Analog L/R & Digital PCM Audio, with Audio Control of Volume, Balance, Bass, Middle, Treble, Lip-Sync, and Mute.

Setup Communication:

Key Digital MXA8x8Pro is controlled by RS232.

Setup in Compass Navigator:

Each module contains inputs and outputs that can be customized. In Zone Construction, please drag and drop the sources, accordingly as they are found on the back of the audio switcher, to the inputs of the KD MXA8x8Pro switch device tree.

Properly setting up the Zone Construction will allow for auto-switching when choosing a device in a modular project.

Setup Complete:

Upload and update project for use.
