Key Digital Announces Compass Control Pro Partner Alliance with all MechoShade Shades

MOUNT VERNON, NY – January 24, 2018– Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that all MechoShade Shades is now compatible with the Compass Control System, the first fully integrated major control system built from the ground up

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with all MechoShade Shades. These products and profiles are rigorously tested by Key Digital. The MechoShade driver will allow for RS-232 control for single motor devices, full control of open, close, track, stop, and presets, and group control is also available

Compass Control® users will be able to use their MechoShade Shades with their Compass Control® app. The MechoShade automated shade-control systems maximize daylighting by moving shade bands up and down on the window. The systems also dim down and turn up the electric lights, in relation to the amount of natural light in the space. The shades and the lights are controlled in tandem, to conserve energy.

“Resulting from cooperative efforts between Key Digital and MechoShade, the integration of its shade-control System represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter. “The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.

About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants,

designers, and installation firms of the A/V industry. Key Digital[®] is known to deliver best-in-class products based on quality, performance, and reliability.

About MechoSahde

Our company was formed in 1969 when the MechoShade[®] window-covering system was developed. It fit the industry's need: an alternative to any other window-covering solution available. The original manually operated roller-shade system is no longer the only of its kind. But no others come close to offering the durability and reliability that its unique, patented design provides.
