Key Digital Announces Compass Control Pro Partner Alliance with RackLink™ by Middle Atlantic Products Through TCP/IP

MOUNT VERNON, NY – January 24, 2018– Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that RackLink™, a power management system from Middle Atlantic Products, is now compatible with the Compass Control System, the first fully integrated major control system built from the ground up.

RackLink™ is a practical web-enabled power management system that sets a new standard for A/V installations. The product can be set up in less than 5 minutes and it will monitor the power and temperature conditions of your system, log and alert you to any irregularities, and even reboot or take another action to correct problems on its own. Middle Atlantic Products has made it easy to set up and operate, with an open architecture that integrates seamlessly with leading control systems – even your smart phone – and is compatible with 'cloud' based services but is not dependent on them.

Engineers at Compass Control profiled RackLink™ and completed a bi-directional driver that enables seamless integration of RackLink™ in the Compass Control environment while greatly reducing the installation time for integrators.

“The RackLink™ system is a practical problem-solver for AV installers,” said Kevin Handerson, Marketing Director for Middle Atlantic Products. “As Compass Alliance™ partners, we are delighted that Key Digital has completed drivers for Compass Control® compatibility – the combination of RackLink and Compass Control will deliver new customer benefits for both installers and end users.”

“Resulting from cooperative efforts between Key Digital and Middle Atlantic Products, the integration of RackLink™ within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter. “The Compass Alliance™ Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.

About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
