Compass Control® Technology Now Compatible with Nest Thermostat and Product

Mount Vernon, NY. Key Digital, Inc. –February 20, 2018–Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that Nest Thermostat and Protect are compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

Key Digital has configured Nest Thermostat and Product web app to work with their Compass Control® system. These products and profiles are rigorously tested by Key Digital. The Nest Thermostat and Product web app will allow for full bi-directional control over the web app, thermostat mode control, scheduling control, settings control, and local network not needed (control Nest products globally).

Compass Control® users will be able to use their Nest Thermostat and Protect with their Compass Control® app. The Nest Learning Thermostat learns your schedule, programs itself and can be controlled from your phone. Teach it well and the Nest Thermostat can lower your heating and cooling bills up to 20%. Nest Protect gives you information, not just alarms. It tells you what the problem is and where it is. And in case you're away from home, it sends a message to your phone. Because a beep simply isn't enough.
