

Discover The Possibilities™

Integra/Onkyo AVR's

Module Setup

About:

Integra/Onkyo provides deep rich sound with their Audio/Video Receivers. Choose from a large selection of Music Modes, including THX, for the perfect sound.

Setup Communication:

Integra/Onkyo AVR's are controlled over IP on port 60128. Please insert the IP Address under Properties for the device.

Setup in Compass Navigator:

When inserting the module, two pages will be found, Onkyo Remote and Onkyo Player. The remote will control all functions of the receiver, and the player will control all streaming services on the receiver. Drag and drop each control page into the desired zone in Zone Construction. No other setup is required.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers
