Integra Blu-ray
Module Setup

About:

Integra provides high definition video and sound from their Blu-ray players. Smart features may also be found which make the perfect home entertainment system.

Setup Communication:

Integra Blue-rays are controlled over IP on port 60128. Please insert the IP Address under Properties for the IP device. The Blu-ray may also be controlled over RS-232.

Setup in Compass Navigator:

Drag and drop the module into the desired zone and source location. Doing so will give the user a simple interface with auto source switching.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers

- Menu and Directional Pad Controls
- Numerical Pad Controls
- Playback Control
- Disc Eject
