Key Digital Announces Compass Control Pro

Partner Alliance with Phoenix Audio Octopus Audio Mixers

MOUNT VERNON, NY – January 29, 2018–Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that Phoenix Audio Octopus Audio Mixers are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Phoenix Audio Octopus Audio Mixers. These products and profiles are rigorously tested by Key Digital. The Phoenix Audio Octopus Audio Mixer driver will allow for RS control, control microphones and speakers, volume control, and mute control.

Compass Control® users will be able to use their Phoenix Audio Octopus Audio Mixers with their Compass Control® app. The Octopus is an Audio Conferencing Mixer that gives you crystal clear audio. Using the Octopus allows you the freedom to mount microphones and speakers anywhere in the room (ceiling, walls, and table tops) for professional sound and a sleek look. The Octopus has a high powered DSP and technology that automatically monitors and mixes the audio. Each Octopus has four microphone inputs (each input can also be designated as a unique auxiliary or sound reinforcement channel), however, the Octopus provides unlimited daisy chain capability, and allows for multiple connectivity options. It comes standard with USB and RCA connectors for VoIP and Video Codec connectivity, with the option of adding a PSTN (analog telephone) interface or a digital telephone interface.

"Resulting from cooperative efforts between Key Digital and Phoenix, the integration of Phoenix Audio Octopus Audio Mixers represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality," stated Key Digital's Vice-President of Sales, Michael Lakhter. *"The Compass Alliance™ Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,"* Lakhter concluded.

About Key Digital®

Led by the "Father of DVD", Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
