PrismOne Radiance

Module Setup

About:

PrismOne is here with Compass Control to provide efficient lighting while maintaining an elegant system that everyone can enjoy.

Setup Communication:

Radiance is controlled over IP on port 80. Please insert the IP Address under Properties for the device.

** Please note that each Radiance Wifi Module requires its own Compass Control Module. Please add multiple control modules accordingly.

Setup in Compass Navigator:

Drag and drop the module into the desired lighting zone. Doing so will give the user a simple interface with two channels of lighting control.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers

- Bi-Directional Feedback For Lighting Levels
- Channel Selection – Ch1, Ch2, or Both
- Dimming Control
- On/Off Control
- Sync Control
