

Discover The Possibilities™

Rane HAL Module Setup

About:

Rane HAL is an expert in room combining, paging and distributed audio systems. This groundbreaking architecture is dimensions beyond any solution in any industry. HAL easily guides even novice users through what used to be complex tasks in just minutes. No intricate matrix mixing or presets are required for room combining and paging. No virtual wiring is required to distribute pages and background music to multiple, even hundreds of zones. Combine HAL and Compass Control for the seamless control you've been looking for.

Setup Communication:

HAL is controlled over TCP/IP on port 4996. Under Device Properties for Rane HAL, please insert the IP Address of the HAL Unit.

Setup in Compass Navigator:

Only one Module is needed for a Rane HAL project setup. In Zone Construction, click and drag the HAL module and place it in an Audio Zone. Once it is placed, head over to Controlling Flow and place the Rane Module in the System Designer.

No further setup is required.

Setup Complete:

Compile and upload the project for use.

Control:

Compass Control offers

- HAL Controls
 - Level Control
 - Toggle Control
 - Selector Control
 - Command Control
