Key Digital Announces Compass Control Pro Partner Alliance with the Rane HAL Series

MOUNT VERNON, NY – January 29, 2018—Key Digital®, an award winning (CES, InfoComm, CEDIA, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that Rane HAL Series is now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up.

Key Digital® has developed a driver and pre-configured GUI template for their Compass Control® system to interface with Rane HAL Series. These products and profiles are rigorously tested by Key Digital®. Now Compass Control® users can use the Rane HAL Series with just a touch of a button. The Rane HAL Series driver will allow for Bi-Directional Communication over IP and control of Levels, Toggles, Selectors, and Commands. It is an all-in-one control module: simply add the IP address and it is ready for control, no extra set up required.

The Compass Control® driver library is expanding every day to bring the best quality and product selection to its users. Compass Control® users will be able to use the Rane HAL Series with their Compass Control® app. The Rane HAL Series is an expert in room combining, paging and distributed audio systems. HAL easily guides even novice users through what used to be complex tasks in just minutes. No intricate matrix mixing or presets are required for room combining and paging. No virtual wiring is required to distribute pages and background music to multiple, even hundreds, of zones.

Today's installers need reliable, easy, and fast integration of video and audio distribution in commercial applications. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability. Compass Control's modular programming method delivers a rich user environment with drag-and-drop programming simplicity.

"Resulting from cooperative efforts between Key Digital and Rane, the integration of Rane Hal Series represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality," stated Key Digital's Vice-President of Sales, Michael Lakhter. "The Compass Alliance™ Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators," Lakhter concluded.

About Key Digital®

Led by the "Father of DVD", Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
