

Russound XStream XSource Module Setup Guide

About:

The XSource Streaming Audio Player is the perfect addition to any Russound system or to add as a source to any amplifier, receiver, or audio system. Designed for audio professionals, it offers rackmount options and is fully IP controllable for integration into 3rd party control systems. With built-in support for high resolution audio and Apple AirPlay, it couldn't be easier to use or more enjoyable.

Setup Communication:

The Russound XStream XSource is controlled over TCP/IP.

Setup in Compass Navigator:

In Zone Construction, please drag and drop the Russound XStream XSource into the tree. Under Controlling Flow, drag and drop the device into the IP Devices group. Enter the IP address of the unit under the device properties. Please add a unique module and follow the same setup procedure for each unit.

Setup Complete:

Upload and update project for use.

Russound 3rd Party Control:

Compass Control integrates with Russound as a 3rd party control system. Russound states, "If using a 3rd party control system to control all source devices, the 3rd party control system MUST be the only control system used."
