Russound XZone70V
Module Setup Guide

About:

The Russound XZone70V features built-in XStream technology, enabling popular streaming content from the cloud, home network, AirPlay™ enabled tablets and phones - all from a single component. The built-in audio streamer offers the best audio content from the internet or even a user's personal networked audio collection using DLNA. The rear panel even includes a USB port for playing content from a Flash Drive or an externally powered USB hard drive. Partnered with Compass Control® Pro users gain the ultimate control experience.

Setup Communication:

The Russound XZone 70V is controlled over TCP/IP.

Setup in Compass Navigator:

In Zone Construction, please drag and drop the XZone 70V into the tree. Under Controlling Flow, drag and drop the device into the IP Devices group. Enter the IP address of the unit under the device properties. Please add a unique module and follow the same setup procedure for each unit.

Setup Complete:

Upload and update project for use.
