

Discover The Possibilities™

Sonance DSP 8-130

Module Setup

About:

The new line of DSP amplifiers feature SONARC (Sonance Advanced Room Correction), which offers hundreds of EQ presets designed specifically for Sonance speakers available through simple pull down menus. The presets enable effortless DSP without the need for additional hardware, software, and more importantly time. Additionally, should there be a need for further customization, SONARC provides a 10-band parametric EQ to optimize sonic performance in any space. Add a Compass Control system to the mix for a smart unique interface.

Setup Communication:

The DSP is controlled over TCP/IP on port 52000. Please add the DSP module into the project with the correct network information.

Setup in Compass Navigator:

Drag and drop the module into the desired audio zone. Doing so will give the user a simple interface with auto source switching once sources are placed on the amplifier's inputs.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers

- Bi-Directional 2-Way Feedback
- Output Power Controls
- Output Selection
- Output Volume
- Output Mute
